Children, young people and Mobile Phones

This article is separated into 4 sections, each of which can be individually downloaded. It is a 'work in progress' incorporating new information whenever time permits.

Section 4

References

1. Use of mobile phones by young people; the psychology pf phone use; which children have phones? How are phones used? Child safety; the phones; SARs (Specific Absorption Rate); the link between phones and masts; summary; campaigning organisations

2. Official advice across the world; the United Kingdom; America; Australia; Austria; Belarus; Belgium; Canada; European Environment Agency (EEA); Finland; France; Germany; Israel; Italy; Norway and Denmark; Russia; Thailand; technological parents

3. The research; summary; addiction; suicidal ideation and suicide attempts; behaviour; brain effects; brain tumours; acoustic neuromas; parotid (salivary) gland tumours; headaches and migraines; hearing; heart; hippocampus; learning, memory and behaviour changes; eye damage; hospital visiting; kidney; mental health problems; mouth cancer; DNA, cellular and organ damage; reproductive effects (testicular cancer, damaged sperm, reduced fertility); risk perception; sciatic nerve damage; sleep; official comments on the implications of the health research; the difficulties with the research
