Mobile Phones

The Mobile Phones set of articles is separated into 9 sections, each of which can be individually downloaded. It is a 'work in progress' incorporating new information whenever time permits.

Section 9
References

1. Introduction; children and safety; mobile phone addiction; tracking and tapping phones; the impact of adverse weather patterns on phone calls; the environmental impact of the technology

2. Are mobile phones a health problem? Is the data trustworthy?

3. Brain tumours and other cancers; 13-nation Interphone study findings, and others; brain tumours; eye cancer; leukaemia; melanoma; personal experiences; pituitary; prostate; salivary gland tumours; skin tumours; stem cells; thyroid cancer; implications; Legal viewpoints

4. Dementia; reproductive effects; neurological effects; cognitive effects; brain activity, children

5. Biological control systems; heat shock protein; DNA; interaction with other environmental exposures and indirect affects; cellular mechanisms; blood changes; oxidative stress

6. Other health effects; general; allergies; babies; bacteria; balance and mobility; bladder; bone growth; bone healing; brain changes; cardiovascular changes; chronic fatigue syndrome (CFS); CNS effects; depression; diabetes; ear effects and hearing; emotionality; epilepsy and seizures; eye effects; gastric effects; growth; hand and arm effects; headaches; heart; hormone effects; immune system; kidney damage; life span; liver; migraines; mouth; multiple sclerosis; neuropathic pain; nose; pain perception; personality changes; physical activity; salivary gland effects; skin; sleep; stress; tendonitis; tinnitus; other effects; drug and other interactions; complexities of study design that may result in finding ‘no effects’; animal, insect and plant experiments and effects; indirect effects; protective effects

7. UK and international regulations and guidelines; exposure places and bans, hospitals, physical therapies, prisons, railways, rural areas; Austria; Belgium; EU; France; Germany; India; Israel; Italy; Japan; Poland; Russia; Taiwan; USA

8. Things you can do to reduce your RF exposure. Phone, time, signal strength, switching off Blackberrys; vulnerable areas; texting; standby; other people; when travelling; headsets; SARs; antennas; electromagnetic noise; protective gizmos; jammers; supplements

9. References – 740 references
